August 1, 2021

Dear Customer:

On September 13, 2019, the Office of Environmental Health Hazard Assessment updated the Safe Drinking Water and Toxic Enforcement Act of 1986 ("California Proposition 65") to include additional chemicals. Wieland Chase, LLC wishes to remind all of our customers that our alloy chemistries are disclosed within our Safety Data Sheets ("SDS") which are located on our website www.wieland-chase.com, under the Quality dropdown. The disclosures within the SDS inform our customers of the chemical content of our alloys and allow them to determine the applicability of the labelling requirements to products or components manufactured from those alloys.

Due to the presence of lead and/or other regulated components under California Proposition 65 within our alloys, Wieland Chase, LLC requires that any customers, who are introducing products or components manufactured from our alloys into the stream of commerce (specifically within the California market), carefully evaluate the applicable SDS as well as their products or components to determine whether a California Proposition 65 warning label is needed. As necessary, the requisite warning label language can be found in the applicable SDS under Section 15.2, entitled *U.S. State Regulations*.
